WORLD ASSOCIATION OF MAJORETTETWIRL

WAMT UNIFIED CODE OF POINTS SYSTEM

The World Association of Majorettetwirl (WAMT) operates under a highly advanced, proprietary, and unified Code of Points system. This innovative scoring framework is designed to ensure absolute objectivity, mathematical precision, and complete transparency in competitive sports governance.

1. The 10-Point Evaluation Matrix

Every performance is evaluated using a standardized 1–10 point scale across three core panels, capturing every dimension of athletic and artistic excellence. The maximum scoring capacity is exactly **30.00 points** (10 points maximum per panel) before any penalty deductions are applied.

- **Panel A: Artistic (Choreography & Composition):** Focuses on the creative design, musicality, staging, visual impact, and overall artistic composition of the routine. (Maximum: 10.00 points)
- **Panel B: Body Technique:** Evaluates the execution, difficulty, postural control, and athletic precision of all dance, gymnastic, and acrobatic body movements. (Maximum: 10.00 points)
- **Panel C: Apparatus & Equipment Technique:** Measures the mastery, handling, speed, and technical difficulty of the baton, pom-poms, or other official equipment. (Maximum: 10.00 points)

2. Dedicated Penalty System (Deductions)

To maintain the highest level of sporting integrity and strict adherence to international rules, WAMT implements two independent Penalty Judges who monitor and enforce regulatory deductions directly from the total accumulated score:

- **Obligatory Deductions:** Ensuring all mandatory core elements, precise timing requirements, and official floor boundary rules are strictly met.
- **Technical Deductions:** Enforcing immediate, objective penalties for visible performance errors such as equipment drops, unison/synchronization mistakes, and the execution of forbidden elements.

> **Regulatory Note:** *All deduction values are strictly standardized, fixed, and fully transparent. The complete, itemized penalty index is public and accessible to all coaches, athletes, and officials within the official WAMT Rulebook.*

3. Technical Levels & Criteria of Excellence

The WAMT Code of Points actively eliminates subjective judging by utilizing rigid, standardized grading matrices and tools:

- **Graded Technical Levels:** A highly defined, progressive scale used to categorize and rate the exact difficulty tier of equipment manipulation and advanced technical elements.
- **Body Difficulty Table:** A comprehensive, structured matrix that legally defines and ranks the specific difficulty values of all physical, dance, gymnastic, and acrobatic movements.
- **Criteria of Excellence:** A meticulously developed rubric providing adjudicators with clear, unambiguous benchmarks to accurately differentiate, evaluate, and reward elite artistic and athletic performances from standard club routines.
